Gates Ag One Fact Sheet

Bill & Melinda Gates Agricultural Innovations (Gates Ag One) is a nonprofit dedicated to ensuring high-quality, cutting-edge crop innovations are accessible to those who need them most. Gates Ag One was founded in 2020.

WHY WE EXIST
To bring breakthrough science to smallholder farmers in Sub-Saharan Africa & South Asia.

Climate change is threatening the lives and livelihoods of smallholder farmers. There is an urgent need for innovations to sustainably improve crop productivity, support adaptation to the impacts of climate change, and spur long-term economic growth.

WHAT WE DO
We work to understand the needs of smallholder farmers first and foremost. Our multidisciplinary team then works with partners to develop and fast-track scientific research to create safe, effective, affordable, and sustainable products that will meet their needs.

HOW WE WORK
Our model is based on building an inclusive community of partners from both high- and low-income countries. These include:

- R&D organizations
- Academic institutions
- Governments
- Private-sector companies
- Cooperatives
- Nonprofits

Working with local partners, we can effectively evaluate, de-risk, and advance the introduction of the best breakthrough crop science into products for farmers to use.

We are a nonprofit subsidiary of the Bill & Melinda Gates Foundation, guided by our shared belief that all lives have equal value.
